Dear Colonel Knight,

**Collision Investigation Research**

I was grateful for the opportunity to meet with you a few weeks ago and discuss various issues relating to collision investigation in Florida. I would like to thank you and your teams for the hospitality and assistance provided with my research study. During my time with the Florida Highway Patrol I was made very welcome. Whilst there are many that assisted during my stay I wish to draw to your particular attention members of your team that were responsible for making arrangements, coordinating and providing time and patience to answer my numerous questions. I found everyone displayed a highly professional approach to their work and they were all a total credit to your police agency.
